MICROSIGNATURE RECORD

No. DSGN-001

INTERPERSONAL AGREEMENT

> *"Given the expanded scope, I propose a revision policy: unlimited minor tweaks through Dec 1, but any new deliverables or major direction changes after Nov 28 will be quoted separately. I'll also provide source files in Figma format—no additional charge."*

ACCEPTED BY BOTH

Algorithm: SHA-256 | Format: Canonical JSON

RECORD INTEGRITY STATEMENT

This record answers four questions:

1. What was agreed?

The exact statement, word for word.

2. Who agreed?

Signatures from both parties.

3. When?

A verifiable timestamp.

4. Can it be altered?

No. Any tampering is detectable.

WITNESS MODEL

- Microsign stores only the cryptographic hash of this record.
- You hold the full content. Both parties receive a copy.
- If the content is ever altered, the hash will no longer match.

WHAT THIS RECORD IS NOT

- This is not a legal contract.
- It does not guarantee enforceability.
- It is contemporaneous evidence of mutual consent.

THIS RECORD CONFIRMS

- The account holder affirmed this exact statement
- Document contents are unchanged since signing
- A timestamp was recorded

THIS RECORD DOES NOT CONFIRM

- Real-world identity
- Physical location
- Legal enforceability
- Capacity to enter agreement

Note on Identity: Signatories are identified by email address only. Microsign does not perform identity verification.

This is a tamper-evident receipt of consent. It is not a legal contract.
